## Columbia Video Network [www.cvn.columbia.edu](http://www.cvn.columbia.edu)

The quality of offerings on Columbia University's Video Network (CVN) is higher than the usual fare. Targeting engineers, CVN offers six MS degrees and certificate programs in several graduate specialties of engineering. Lectures, course materials, class notes, homework assignments and syllabi are all available online. Students report having very receptive and dedicated TAs and professors who quickly respond to queries and grade work.

**BEST:** A top-notch program, with the bonus of a prestigious name.

**WORST:** Offerings limited to engineering.
